ROADCOAT **G3 OS-11**

PARKDECK WATERPROOF DRIVING SURFACE

SYSTEM DESIGN LIFE

The ROADCOAT **G3 OS-11** Waterproof Driving Surface is warranted for 12 years as being and remaining suitable for the purpose intended as defined in the warranty. The tests done after accelerated weathering and UV, calculated as 20 years in Northern European Climates, as well as installations done in 1990, show no deterioration in the warranted properties of the **G3 OS-11**. As the system once cured is inert, there is no reason to expect it to change its properties and thus become unsuitable for the intended purpose.

Assuming timely repairs to mechanical damage or defects due to structural movements in excess of the BS 8110 design parameters, as well as possible wear-course refurbishment at areas of high loading, the **G3 OS-11** has the same design life as the structure.

We herewith confirm that the above is specifically applicable to the attached Warranty dated

Robert A Roehder
